Remote & Willing to Relocate

SUMMARY

I am a *passionate developer*, a *Lego fan*, and a *coffee lover*. I'm from Venezuela and currently living in Chile.

I've been working as a Software Developer since 2014, but I started coding when I was young. I specialize in FrontEnd, JavaScript, and FullStack development. With extensive experience in various software tools and methodologies, I bring a diverse skill set and a collaborative approach to innovative projects. I like to work on UI, UX, and DX, solving problems, optimization, mentoring, and constantly learning.

TL;DR: I like to build apps* to solve complex and tedious issues with simple solutions and great experience.

WORK EXPERIENCE - Since 2014

Senior FullStack JavaScript Engineer, Cleverttech | Sept 2020 - Present

- Working as DRI on different projects as an architect, designing databases and APIs, work required, etc.
- I'm building software solutions for startups by transforming concepts into applications, with careful consideration of time constraints, expertise, and budget.
- Improved and automated processes to reduce workload and time on daily tasks for developers and teams.
- Focused on improving app response times, maintaining UI consistency, and refining existing features.

SSR Advanced Web UI Developer, Globant | Jul 2019 - Sept 2020

- Improved user experience and performance, reducing load times by 50% on the flight tickets and awards (Redeem ticket) flow for LATAM Airlines.
- Provided mentorship for juniors & mid-level developers. Participated in the technical interviews.

FrontEnd Developer, Beetrack | Oct 2018 - Jul 2019

- Releasing the first version of one of their main products in a month.
- Developed a core library for a wide-range app to reduce costs by 90%, changing providers on demand.

Business Developer, Platanus | Sep 2017 - Oct 2018

- I worked on eight projects: Launching two apps, updating four others, and supporting smaller projects.

Developer ⁰, Developer+¹, Technical Lead ², Cleteci | 0: Sep 2014 - 1: Jan 2016 - 2: Feb 2017 - Aug 2017

- Acted as DRI and TL on different projects as an architect, designing databases and APIs, etc.
- Contributed to the enhancement and implementation processes for the development team.
- Implemented CI, achieving a reduction in deployment time by 90% and minimizing human errors.
- Provided mentorship for juniors & mid-level developers. Participated in conducting the technical interviews.

VOLUNTEERING & COMMUNITY

Core Team - Tech Lead & Web Development, JS Chile | Sept 2022 - Present

- Leading and contributing to projects aligned with the objectives of the NGO, focused on UI, UX, and SEO.
- Developing a new system for JSConf Chile as an open-source software project intended for community use.

Organizer - Focused on Web Development, JSConf Chile | Feb 3rd & 4th

- Designing the application with an emphasis on UX, SEO, DX, and optimization.
- Implemented theme systems for event elements such as tickets, video players, sponsors, and animations.
- Developed complementary applications, including a ticket and benefits validator, a LinkTree alternative, etc.

EDUCATION

Computer Engineer, Simón Bolívar University | Sept 2007 - Nov 2015

Specialization: 1. Databases, 2. (C.G.) Computer Graphics & 3. Software Development Workshop.

Electives: 1. Mobile, 2. Methodologies, 3. & 4. A.I. on Robotics and Games, 5. C.G. on Games & 6. A.R.

LANGUAGES

English - Upper-Intermediate | **Spanish** - Native speaker
